

Connecting Our World is about creating a better world through international education. We are a community of individuals taking action to support public policies that strengthen and expand international education.

We believe that international education and exchange – connecting students, scholars, educators, and citizens across borders – is fundamental to building mutual understanding among nations; preparing the next generation with vital cross-cultural and global skills; and creating the conditions for a more peaceful world.

www.ConnectingOurWorld.org is dedicated to:

Educating government and the public about the important role of international education in fostering peace, security, and well-being around the world.

Connecting individuals worldwide in conversation about the power and potential of international education.

Mobilizing a grassroots community of individuals to take action to support international education, especially by communicating with their elected officials.
