

## LEVELS OF GLOBAL LEARNING

### **Level 1 Contains an international component.**

- Analyzing and international website for information.
- Converting values from British (U.S.) to metric systems.
- Using photos of various places around the world.
- Referring to developments in your field that come from outside the U.S.

### **Level 2 Has one component that is internationally oriented.**

- Teaching a unit in international marketing in a marketing class.
- Teaching a unit contrasting scientific/technological development between or among different cultures.
- Teaching a unit in a nursing class on medical practices in other parts of the world.

### **Level 3 Integrates international components throughout.**

- Contrasts the international orientation in aspects of business management (finance, marketing, law, etc.) with those in the U.S.
- Requires students to consider an international viewpoint for completing assignments for different units of a course in education, law, engineering, sociology, etc.
- Uses situational research conducted in another country to address local problems in that country/region.

### **Level 4 Is entirely internationally focused.**

- World language courses.
- Courses on specific cultures and countries.
- World history, geography, health care, bio-environmental, manufacturing, sociology courses, i.e. classes that is designed to compare and contrast regions, cultures, issues, etc. of the world.
- Business courses taught with all assignments geared to policies and practices outside the U.S.
- Participation in locally produced international events.

### **Level 5 Integrates international experience and engagement with others [of other cultures].**

- Study abroad experiences.
- Internship abroad experiences.
- Significant virtual (Skype, ooVoo, webinar) interactions with people in another country.
