May 28 - June 2 • Los Angeles, CA USA

Colloquium Welcome and Overview

○ Who are you and why are you here?

- A highly diverse group of 60+ colleagues from across the United States and 9 different countries with shared interests and goals in global assessment
- **Sample Survey Responses**
 - *We are looking to expand efforts around assessment of global learning at our institution*
 - *We added a global learning component to our General Eds and we need to start assessing it in the near future*
 - *We are working on developing learning outcomes and looking for assessment tools on our campus currently*
 - *We have applied for a grant to tighten our strategies for evaluating our short term teaching abroad initiatives*
 - *I work in global health education and assessing students (and evaluating programs) is an ongoing concern*
 - *I am in the midst of trying to develop a plan and implement intercultural assessment for short-term programs abroad at our institution. The colloquium seems to offer timely and relevant information*

Colloquium Welcome and Overview

■ Sample Survey Responses

- *I need to deepen my knowledge about assessment*
- *I am new in my position and know that I will be expected to provide assessment data*
- *[The colloquium] includes topics I want to use in my research projects*
- *I hope to learn the most up-to-date thinking on assessment of global learning*
- *What options we have to evaluate the work that we already do so that we can focus on what does work for our institution*
- *Various theories, methodologies, and approaches to assessment*
- *I would like to hear from other campuses about assessment experiences and how to maximize the results of assessment for improvement of international programs*
- *Different methods to assess global learning*
- *Best practices for assessment and what other universities are doing to measure student learning outcomes*
- *How do we know when a student has been "successful" in achieving global learning*
- *How do we define and measure our target outcomes*
- *We are struggling to establish how and what to assess*

Colloquium Welcome and Overview

- **How the colloquium is structured: Three overarching emphases**
 - **Theory: What is global learning and how do we assess it?**
 - Principles, practices, and processes: Craig Shealy & Darla Deardorff
 - Transformative learning and the assessment of change: John Dirkx
 - **Application: How does assessment illustrate what global learning looks like in practice?**
 - From theory to practice: How do we operationalize interventions and demonstrate change? – Jennifer Wiley
 - Examples of application: John Dirkx, Darla Deardorff, Craig Shealy, Jiangyuan (JY) Zhou, Aaron Yarmoshuk, Elvira Castillo, Kati Csoman
 - **Planning: How do we translate this information into our own assessment goals and plans?**
 - Working lunch on global learning assessment
 - Small group planning and discussion
 - Reporting out of points and plans
 - Post – Colloquium: Possibility of establishing a “NAFSA Assessment Network”

Assessing Global Learning: Principles and Practices from the Forum BEVI Project

Forum BEVI Project

The Forum BEVI Project is a special collaboration between the [International Beliefs and Values Institute \(IBAVI\)](#) and the Forum on Education Abroad. Initiated in 2007, this state-of-the-art project uses the Beliefs, Events, and Values Inventory (BEVI) to assess the processes and outcomes of international, multicultural, and transformative learning, broadly defined.

Project Overview and Recent Activities

To learn more about the latest developments, please see the PowerPoint presentation from the April, 2011 roundtable session at the Forum Annual Conference, [The Forum BEVI Project in 2010 - 2011: Assessment, Research, Teaching, and Training](#), along with the [current activities and future plans of the Forum - IBAVI Working Group on BEVI Implementation in Research, Education, and Practice](#). If you, your institution, or organization would like to learn more about this project, including how to participate or gain access to the BEVI, please feel free to contact one or more members of the Working Group (contact information is available at the above link), the Forum on Education Abroad (info@forumea.org), or the International Beliefs and Values Institute (ibavi@ibavi.org).

About the BEVI

In development since the early 1990s, the [Beliefs, Events, and Values Inventory \(BEVI\)](#) is an innovative analytic tool that examines how and why we come to see ourselves, others, and the larger world as we do (e.g., how life experiences, culture, and context affect our beliefs, values, and worldview) as well as the influence of such processes on multiple aspects of human functioning (e.g., learning processes, relationships, personal growth, the pursuit of life goals). For example, highly relevant to international, multicultural, and transformative learning, the BEVI assesses processes such as:

- Basic openness;
- The tendency to (or not to) stereotype in particular ways;
- Self- and emotional awareness;
- Preferred strategies for making sense of why “other” people and cultures “do what they do”;
- Global engagement (e.g., receptivity to different cultures, religions, and social practices); and,
- Worldview shift (e.g., to what degree do beliefs and values change as a result of specific experiences).

The only person who is educated is the one who has learned how to learn and change. – Carl Rogers

The Forum BEVI Project: Implications for International, Multicultural, and Transformative Learning

Given the scope of this work, it is challenging to select only a small sample of findings from hundreds in order to identify the most salient “lessons learned.” Ultimately, it proved most useful to distill all that we discovered through this project into a series of 15 implications for international, multicultural, and transformative learning:

1. Who we are affects whether, what, and how we learn.
2. Education, broadly defined, is associated with – and likely causes – change in beliefs and values.
3. To understand how effective our interventions are, we must assess who learners are.
4. It is possible to predict who will be interested in – and satisfied by – a learning experience even before the learning experience actually occurs.
5. Specific analyses may be conducted for purposes of outreach and engagement.

**To review all 15 implications from the Forum
BEVI Project, please see:

ANDSCHNEIDERetal-FrontiersXXV-
Spring2015.pdf](http://www.frontiersjournal.com/documents/WANDSCHNEIDERetal-FrontiersXXV-Spring2015.pdf)**

Six Recommendations for Collaborative Success

See <http://oia.osu.edu/presentations/2566-international-program-evaluation-the-power-of-collaboration.html>

1. **Assess Deeply** (e.g., encourage innovation; integrate mixed methods; strive for ecological validity; evaluate interactions, mediators, and levels of analysis);
2. **Address Challenges** (e.g., political, time, economic; science/humanities split; not knowing what one doesn't know);
3. **Secure Support** (e.g., institutional/organizational; develop functional team; identify and pool resources);
4. **Ensure Expertise** (e.g., theory/data link; research design; psychometrics; statistical);
5. **Develop Plan** (e.g., specify assessment goals and outcomes; select measures; assign roles and responsibilities; monitor/correct processes); and
6. **Value Collaboration** (e.g., recognize team talents; appraise/meet local needs; facilitate buy in; solicit input/feedback).

Assessing Global Learning: Principles from the Forum BEVI Project

Principle 1

*You can't know where to go
if you don't know where you are.*

- There is no way to improve “student learning outcomes” if you don’t assess such outcomes. That is, you can’t know if your students are “improving” if you don’t gather data regarding where they “start” and where they “end.”
- But, neither is it as simple as that...

Assessing Global Learning: Principles from the Forum BEVI Project

Principle 2 *Define your terms.*

- What do we mean by phrases such as “international learning,” “intercultural development,” “global citizenship,” or “student success”?
- These are constructs, any one of which may be defined as “a concept or a mental representation of shared attributes or characteristics, and it is assumed to exist because it gives rise to observable or measurable phenomena” (Hublely & Zumbo, 2013, p. 3).

Assessing Global Learning: Principles from the Forum BEVI Project

Principle 3

***Assess complex constructs
in an ecologically valid manner.***

- Institutions and organizations may differ wildly not only in their definitions of such constructs, but may – and do – go about measuring them in radically different ways, and with methods that may or may not meet minimal standards of assessment best practice.
- So, even if measurement occurs, the data that are gathered regarding the effectiveness of a particular learning intervention (e.g., a course, a program of study, an international learning experience, institutional learning goals) may be uninterpretable, or worse yet, uninterpretable but interpreted nonetheless.

Assessing Global Learning: Principles from the Forum BEVI Project

Principle 4

***Good assessment practice
is good assessment research.***

- To understand whether, how, for whom, and under what circumstances “improvement” is occurring, we must assess longitudinally (i.e., over time and on more than one occasion) the complex and interacting mediators and moderators of such change (e.g., life history, affective capacity, attributional tendencies, self / other awareness, and the like).
- If we do not assess in this manner, there is no way to determine if the “student learning outcomes” we observe are due to our learning interventions, the attributes and experiences our students bring to the learning process, or more likely, interactions between these different levels of analysis (e.g., see the “7Ds”).

Assessing Global Learning: Principles from the Forum BEVI Project

Principle 5

***Good assessment practice
should be meaningful, relevant, and fascinating.***

- Assessment often has a “bad name” for many reasons:
 - lacks necessary and sufficient reliability and validity
 - implemented in a de-contextualized, culturally-insensitive, or oversimplified manner
 - artificially reduces human complexity
 - too face valid or unidimensional to capture and illuminate interacting phenomena
 - theoretically underdeveloped, which impedes operationalization, measurement, analysis, and interpretation
 - not translated into understandable terms for non-assessment experts
 - too far removed from whatever processes or outcomes it is designed to assess
 - insufficiently attendant to real world implications and applications
- It is possible – indeed necessary – to assess complex phenomena such as “global learning” in ways that are meaningful, relevant, and fascinating.

Assessing Global Learning: Best Practices from the Forum BEVI Project

Practice 1

Convene your assessment team and review models and methods for developing an assessment plan (e.g., the above 15 implications, “7Ds,” and 5 principles may be helpful).

Practice 2

Determine your focus and derive consensus (e.g., which learning experiences / levels of analysis).

Practice 3

Review learning outcomes that are relevant and measurable (e.g., external and internal to your institution).

Practice 4

Select demonstrably valid and reliable measures that theoretically link to these outcomes (e.g., ideally mixed methods, including quantitative and qualitative).

Practice 5

Ensure long-term commitment to your plan (e.g., via longitudinal assessment, ongoing review / analysis, institutional buy-in, and modification as needed over time).

About this journal

The *Journal of Transformative Education (JTED)* is a peer-reviewed, scholarly journal focused on advancing the understanding, practice, and experience of transformative education. *JTED* offers articles that test, build on, and elaborate existing theoretical perspectives; demonstrate innovative and creative applications of the theory in practice; and explore the international and cross-cultural issues of the theory and practice of transformative learning. This journal is a member of the [Committee on Publication Ethics \(COPE\)](#).

myCAP: Cultural Awareness Profile

The My Cultural Awareness Profile (myCAP®) Suite of Resources is part of a series of professional development opportunities and materials provided by NAFSA to encourage internationalization of teacher education and support faculty members in colleges and departments of education in preparing teachers for twenty-first century classrooms.

myCAP
Cultural Awareness Profile

Initiating Discussion About Cultural and Global Awareness

In the twenty-first century, teachers are working in a culturally diverse and globally interconnected world. Classrooms are increasingly diverse, leading to calls for teachers to become better equipped to differentiate instruction and approaches to learning. Developing cultural awareness, intercultural skills, and global perspectives is essential. Preservice and in-service teachers should have access to training and preparation that can help them learn about the cultural and global dimensions of the content they will teach, uncover their own cultural identities, and learn to teach within culturally diverse classrooms.

High-Impact Educational Practices

A Brief Overview

Excerpt from *High-Impact Educational Practices: What They Are, Who Has Access to Them, and Why They Matter*, by George D. Kuh (AAC&U, 2008)

[Chart of High-Impact Practices](#) (pdf)

High-Impact Educational Practices: A Brief Overview

The following teaching and learning practices have been widely tested and have been shown to be beneficial for college students from many backgrounds. These practices take many different forms, depending on learner characteristics and on institutional priorities and contexts.

On many campuses, assessment of student involvement in active learning practices such as these has made it possible to assess the practices' contribution to students' cumulative learning. However, on almost all campuses, utilization of active learning practices is unsystematic, to the detriment of student learning. Presented below are brief descriptions of high-impact practices that educational research suggests increase rates of student retention and student engagement. The rest of this publication will explore in more detail why these types of practices are effective, which students have access to them, and, finally, what effect they might have on different cohorts of students.

Forum BEVI Project

The Forum on Education Abroad collaborated with the International Beliefs and Values Institute (IBAVI) to pilot the Beliefs, Events, and Values Inventory (BEVI).

For a discussion of implications and results of the BEVI pilot, see Elizabeth Wandschneider, et al: "The Forum BEVI Project: Applications and Implications for International, Multicultural, and Transformative Learning" *Frontiers: the Interdisciplinary Journal of Study Abroad*, XXV, Spring 2015.

About the BEVI

In development since the early 1990s, the Beliefs, Events, and Values Inventory (BEVI) is an analytic tool that examines how and why we come to see ourselves, others, and the larger world as we do (e.g., how life experiences, culture, and context affect our beliefs, values, and worldviews) as well as the influence of such processes on multiple aspects of human functioning (e.g., learning processes, relationships, personal growth, the pursuit of life goals). For example, highly relevant to international, multicultural, and transformative learning, the BEVI assesses processes such as:

- Basic openness;
- The tendency to (or not to) stereotype in particular ways;
- Self- and emotional awareness;

Assessing Global Learning: Example from the Forum BEVI Project

Craig N. Shealy, Ph.D.

www.thebevi.com

The BEVI...is designed to assess a number of relevant processes and constructs including (but not limited to): basic openness; receptivity to different cultures, religions, and social practices; the tendency (or not) to stereotype in particular ways; self and emotional awareness; and preferred but implicit strategies for making sense of why 'other' people and cultures 'do what they do' (Shealy, 2005, p. 99).

Psychometric Properties of the BEVI

Model Fit Information for BEVI Scales

	Chi-square	df	p-value	CFI	RMSEA

Meaning Quest	836.661	61	0.000	0.925	0.074

How is the BEVI used?

1. **evaluating learning experiences** (e.g., study abroad, multicultural courses, training programs, service learning, etc.);
2. **understanding learning processes** (e.g., who learns what and why, and under what circumstances);
3. **promoting learning objectives** (e.g., increased awareness of self, others, and the larger world);
4. **enhancing teaching and program quality** (e.g., which experiences, courses, programs have what impact, and why);
5. **facilitating growth and development** (e.g., of individuals, groups, and organizations);
6. **conducting research** (e.g., how, why, and under what circumstances people become more “open” to different cultures);
7. **addressing organizational needs** (e.g., staff/leadership development); and,
8. **complying with assessment and accreditation requirements** (e.g., linking objectives to outcomes).

Equilintegration (EI) Theory and BEVI

El theory 'explain[s] the processes by which beliefs, values, and worldviews are acquired and maintained, why their alteration is typically resisted, and how and under what circumstances their modification occurs'...the BEVI is 'designed to identify and predict a variety of developmental, affective, and attributional processes and outcomes that are integral to El Theory' (Shealy, 2004, p. 1075).

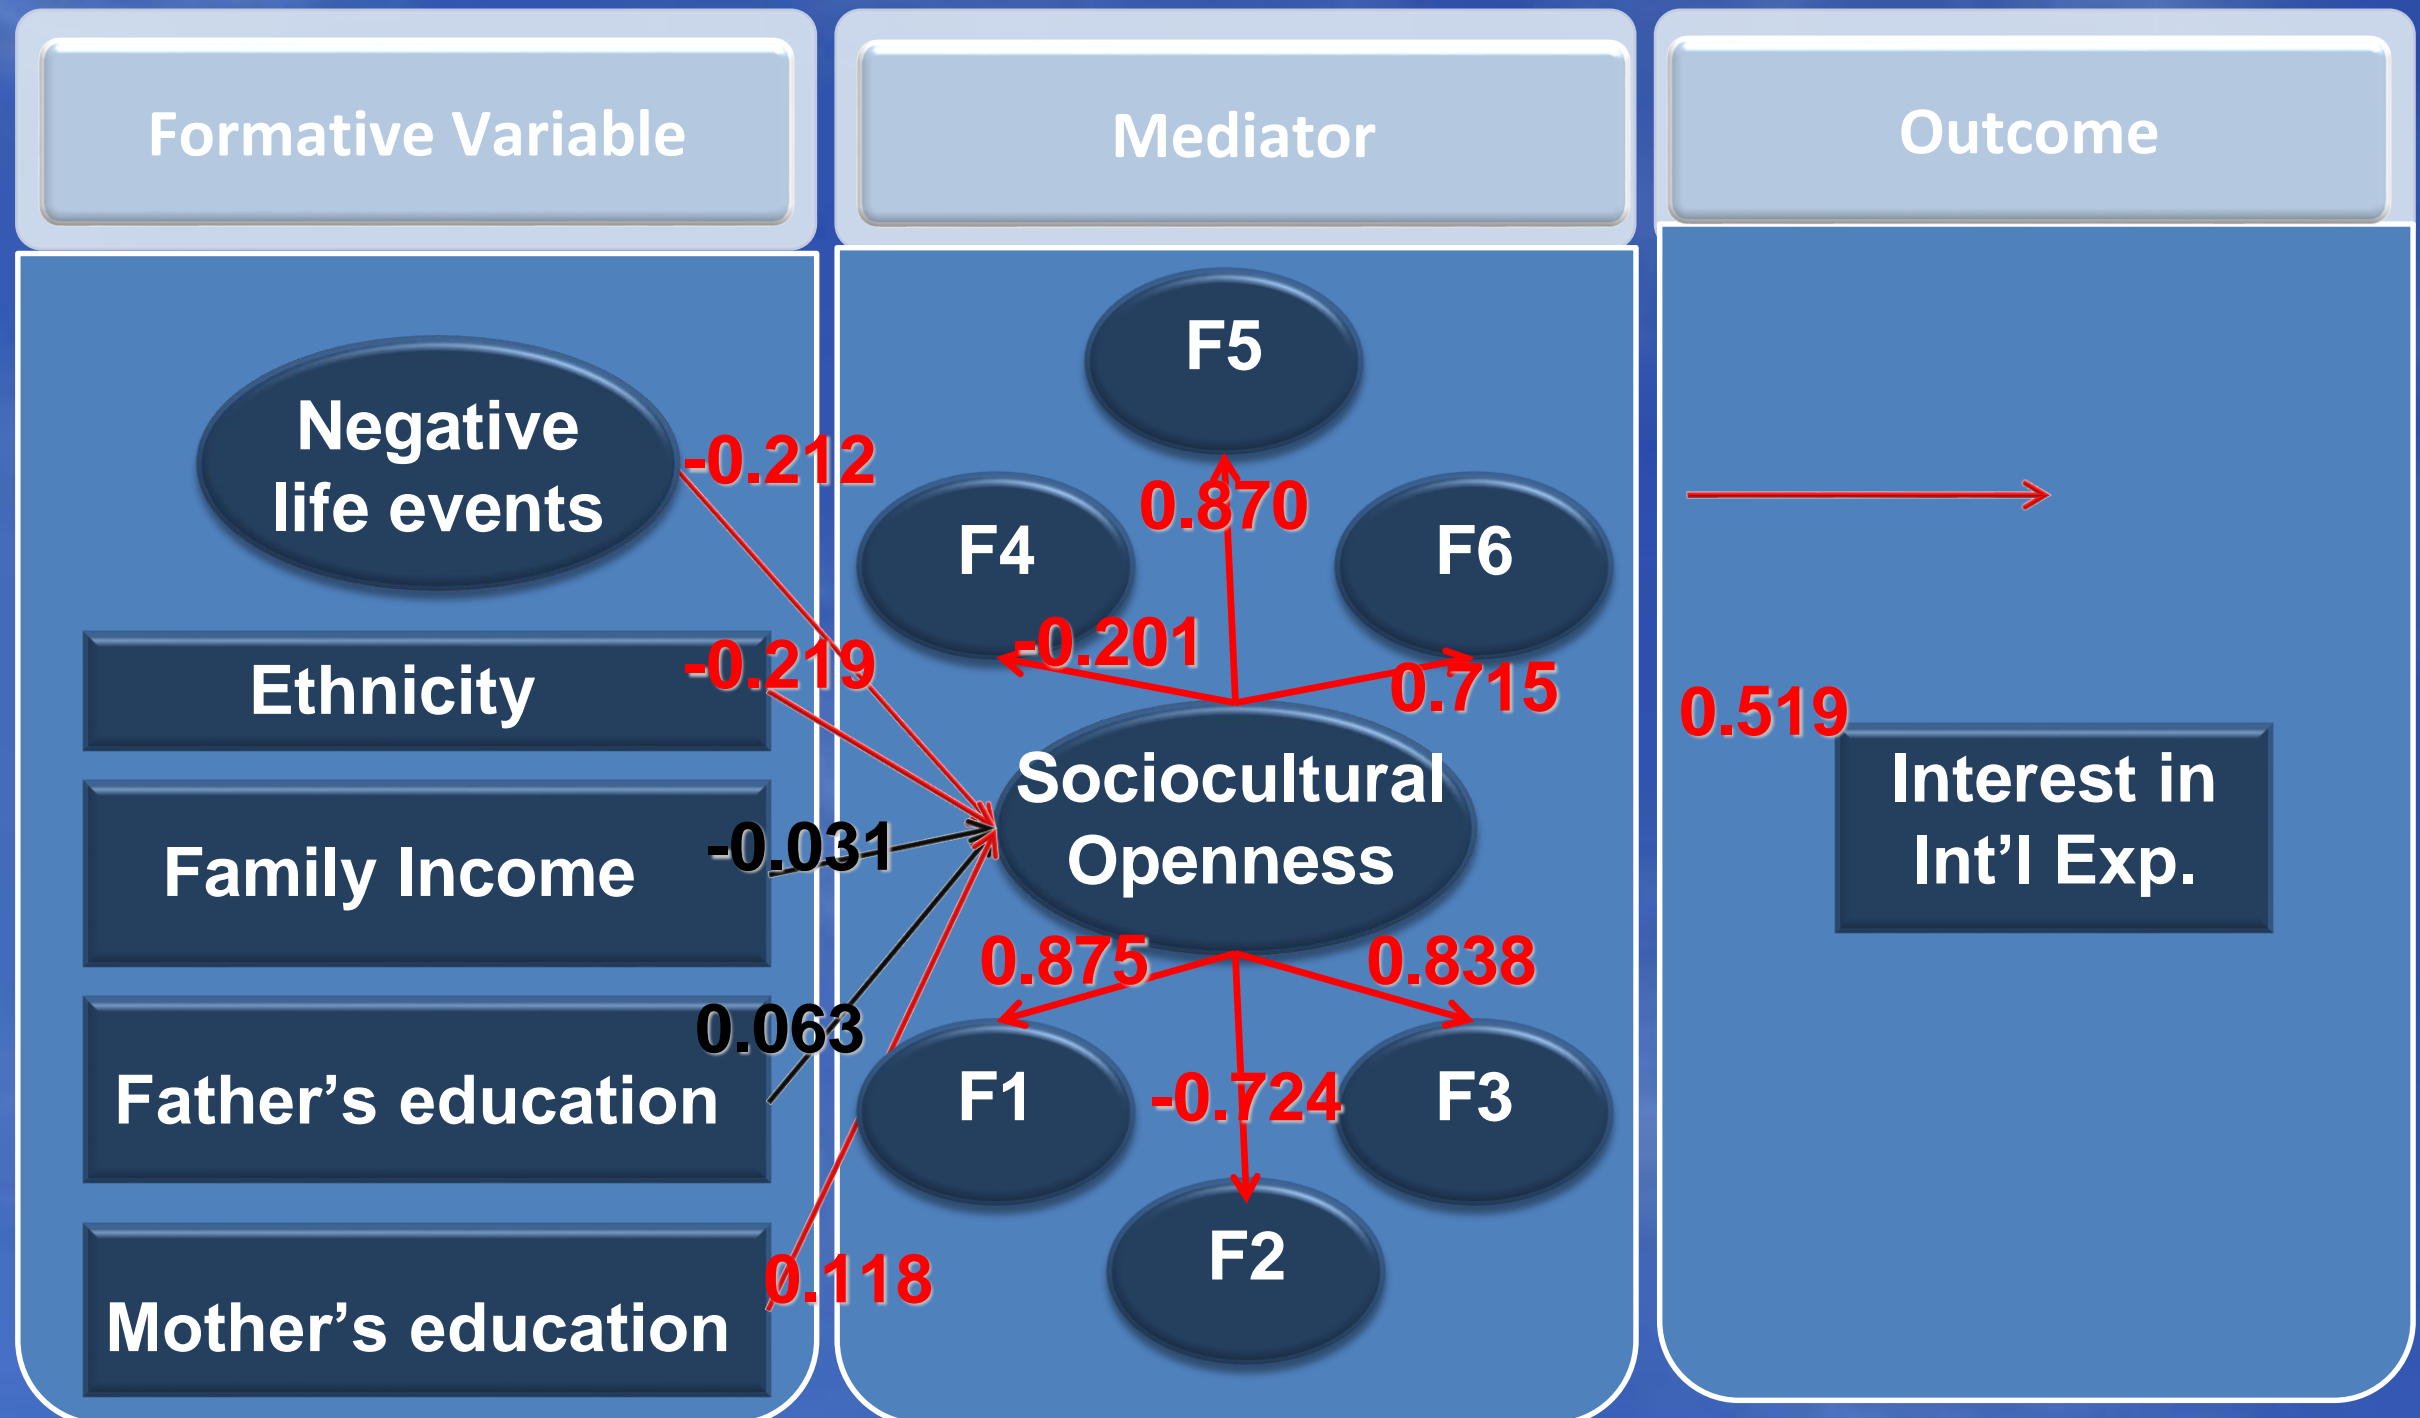

Forum BEVI Project Implications

It is possible to predict who will be interested in – and satisfied by – a learning experience even before the learning experience actually occurs.

If formative variables (e.g., life history, demographics) and mediators (e.g., affective capacity, attributional styles) are assessed with sufficient breadth and depth, it is possible to predict statistically who is, and is not, likely to be inclined toward participation in a learning experience – and who is, and is not, likely to report that they actually benefitted from and/or were transformed by a learning experience – even before the experience occurs.

Key Finding: Life history / background influences openness to different cultures, beliefs, and practices, which influences learning interest

--> = $p < .05$

$X^2=5003.382$, $df=1211$, $p=0.000$, $RMSEA=0.054$, $CFI=0.934$

Forum BEVI Project Implications

Educational experiences are associated with desirable as well as undesirable processes and outcomes.

Depending upon the nature and quality of the learning experience – and the life histories, worldviews, and capacities of those who deliver and engage in it – measurable processes and outcomes may or may not be in the direction that was anticipated. As educators, researchers, and administrators, we should embrace the fundamentally experimental nature of our work (e.g., we may learn as much from what doesn't work as what does).

Comparative Results Before and After Completion of a Course Designed to Increase Intercultural Understanding

Scales	Time			Gender		
	Pre	Post	F	Female	Male	F
Causal Closure	1.229	1.317	7.780 (1, 133)**	1.196	1.351	11.595 (1, 133)***
Basic Determinism	1.718	1.856	9.187 (1, 134)***	1.615	1.958	19.196 (1, 134)***
Emotional Attunement	3.013	3.133	6.920 (1, 133)**	3.257	2.889	13.581 (1, 133)***
Global Engagement	2.647	2.579	4.454 (1, 134)*	2.691	2.535	7.662 (1, 134)**

Note: * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$

Forum BEVI Project Implications

Examining only overall findings (e.g. aggregate) or privileging only a few BEVI scales constitute tempting but counter-productive approaches to comprehensive assessment.

Aggregate findings can be misleading because they may mask or wash out “opposing” data for subgroups, which, when compiled, “cancel” each other out and become invisible. Likewise, ignoring some of the scales to focus on only a few (i.e., Sociocultural Openness) fails to recognize the rich and complex processes students undergo, the relationships between these processes, and the importance of assessing other aspects of learning.

Sample Aggregate Profile versus Profile Contrast for Identity Diffusion

4. Identity Diffusion (T1)	18
----------------------------	----

4. Identity Diffusion (T2)	18
----------------------------	----

4. Identity Diffusion (Lowest T1)	23
-----------------------------------	----

4. Identity Diffusion (Lowest T2)	10
-----------------------------------	----

4. Identity Diffusion (Middle T1)	28
-----------------------------------	----

4. Identity Diffusion (Middle T2)	19
-----------------------------------	----

4. Identity Diffusion (Highest T1)	9
------------------------------------	---

4. Identity Diffusion (Highest T2)	25
------------------------------------	----

Why Longitudinal Assessment Matters

Contrasting Prototype Response Excerpts to **Qualitative Question 3 from the BEVI:**

*What are you learning or how are you
different as a result of this experience?*

- *I realize how privileged I have been in my life.*
- *I now see why my country is the best place to live in the world.*
- *Who I thought I was is very different from what I think now.*

Forum BEVI Project Implications

Although distinct characteristics of various cross-cultural groups are identifiable, broad-based assessment suggests greater within than between group variation.

A focus on differences between cultural groups is interesting and relevant, but may obscure the fact that greater variability may occur more often within, rather than between, different cultural groups. Such a conclusion has important implications for how we understand “the nature of human nature” and why we become who we become (e.g., the formative variables that affect how and why we understand and experience self, others, and the larger world as we do).

Forum BEVI Project Implications

It is possible to identify the profile or signature of an institution or organization.

The aggregate profile of **the BEVI may illuminate how a student body or staff configuration at a given institution or organization may be described** (e.g., how the student body / staff tends to see self, others, and the larger world). This profile appears to be relatively consistent across years, indicating that the characteristics of an institution's student body may be relatively stable and measurable.

Each Institution Has A Unique BEVI Student Profile Which May Be Tracked Across Years

Low=strongly disagree - High=strongly agree

Forum BEVI Project Implications

By joint usage of individual and group reports, multiple opportunities for self-assessment, dialogue, enhanced understanding, and group development may be facilitated.

On multiple occasions, different cohorts have used the individual and group report system simultaneously in order to enhance understanding of how one sees self, others, and the larger world. By juxtaposing the individual reports (which are individualized based upon unique scores, and read privately by each individual) with the group report (which shows similarities and differences within the group, and are reviewed publicly with the group as a whole), abundant opportunities arise for increased understanding, dialogue, and growth.

You and Your Worldview

A Personal Report from the Beliefs, Events, and Values Inventory (BEVI)TM

User: 9389488

Date of Test: 8/29/2012

Introduction

Pick up a newspaper or turn on a radio or television anywhere in the world and one fact becomes immediately clear: beliefs and values are integral to the human experience. People have strong opinions about topics from politics, religion, education and the arts, to marriage, family, gender, and sexuality. However, whether a specific belief is "right" or "wrong" is arguably less important than understanding the complex interaction among thoughts, feelings, behavior, life history, and context that results in a unique version of reality for each human being. Such understanding is important because beliefs and values influence the actions, policies, and practices of individuals, groups, organizations, governments, and societies all over the world. The BEVI provides a way for us to explore these complex issues at the individual level, by helping each of us to make sense of why we hold certain beliefs and values, while also examining why other people may see the world in similar and different ways. At the outset, however, it is very important to emphasize that the BEVI takes no position on whether one set of beliefs and values is "right," "wrong," "better," or "worse" than any other set of beliefs and values.

So, let's take a closer look at what you seem to believe and value, while also offering some possibilities about why you believe what you believe. In addition to explanatory information throughout this report, your unique responses to the BEVI are highlighted in bold. Admittedly, these "what" and "why"

Forum BEVI Project Implications

Changes in beliefs and values about self, others, and the world at large seems determined largely by the 7Ds (duration, difference, depth, determine, design, deliver, debrief).

**Changes in beliefs and values
about self, others, and the world at large
appear determined largely by the 7Ds**

1. **duration** (i.e., how long an international, multicultural, or transformative education experience occurs);
2. **difference** (i.e., how different the experience is from what the “self” of the experiencer is accustomed);
3. **depth** (i.e., what the capacity of the learner is to experience all that the intervention is able to convey);
4. **determine** (i.e., through formal and informal assessment, how well the intervener understands his / her audience);
5. **design** (i.e., based upon knowledge of the audience and careful deliberation and development, what the quality of the intervention is);
6. **deliver** (i.e., how well the intervener can fulfill the transformative potential of the intervention); and,
7. **debrief** (i.e., before, during, and after the intervention, how deeply the intervener assesses the nature of the learning experience, and uses such feedback to improve future interventions).
