

CRISIS MANAGEMENT for EDUCATION ABROAD

Edited by Patricia C. Martin

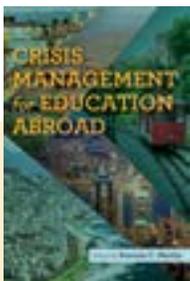

Student Health Insurance for Education Abroad Programs

Maintaining appropriate insurance coverage for education abroad programs is essential to the responsible operations of any institution. International education activities can produce a range of special considerations, and a variety of insurance and assistance companies have developed products to address these needs. Well-designed insurance policies and provisions can help ensure an appropriate response to crisis situations. For additional guidance and resources on insurance for crisis management, and more checklists, read Chapter Eight in *Crisis Management for Education Abroad*, available for purchase online from the [NAFSA bookstore](#).
