Government Connection: Monitoring Travel Advisories and Conditions Abroad During COVID-19

August 12th, 2PM Eastern Time
Agenda

- Welcome
- Audience Poll
- Consular Safety and Security Messaging
- Risk Analysis, Policy Changes and Lessons Learned
- Discussion
- NAFSA Resources, Advocacy, Upcoming Events
Consular Safety and Security Messaging

Beth Klimow & Tim Starkweather
Country Officers
Office of American Citizen Services
What is our goal?

To make our safety and security messaging:

- Easy to Find
- Easy to Use
- Easy to Understand

Travel Advisory
August 6, 2020
Canada - Level 3: Reconsider Travel

Reconsider travel to Canada due to COVID-19.

Read the Department of State’s COVID-19 page before you plan any international travel.

The Centers for Disease Control and Prevention (CDC) has issued a Level 3 Travel Health Notice for Canada due to COVID-19.

Canada has lifted stay at home orders, and resumed some transportation options and business operations. Visit the Embassy’s COVID-19 page for more information on COVID-19 in Canada.

Read the Country Information page.

If you decide to travel to Canada:

- See the U.S. Embassy’s web page regarding COVID-19.
- Visit the CDC’s webpage on Travel and COVID-19.
- Enroll in the Smart Traveler Enrollment Program (STEP) to receive Alerts and make it easier to locate you in an emergency.
- Follow the Department of State on Facebook and Twitter.
- Review the Crime and Safety Reports for Canada.
- Prepare a contingency plan for emergency situations. Review the Traveler’s Checklist.

Last Update: Reissued with updates to COVID-19 information.
COVID Information on Embassy Web Pages

COVID-19 – Visa Services and Restrictions

Information on COVID-19 from the Centers for Disease Control and Prevention (CDC)

July 16, 2020 – Travel Restrictions Fact Sheet: COVID-19 Related Travel Restrictions across the U.S. Borders with Canada and Mexico

March 20, 2020 – U.S.-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the U.S.-Canada Land Border for Non-Essential Purposes

Country-Specific Information:

- Canada has confirmed cases of COVID-19 within its borders.
- On July 16, the United States and Canada announced a mutual agreement to extend restrictions on non-essential travel across our shared border for an additional 30 days.
  - “Non-essential” travel includes travel that is considered tourism or recreational in nature. “Essential travel” still permitted includes: work and study, critical infrastructure support, economic services and supply chains, health, immediate medical care, and safety and security.
  - U.S. citizens, lawful permanent residents, and individuals with valid travel documents will be exempted.
  - Trade and business travel will continue to operate across our borders, ensuring workers and

Risk Analysis, Policy Changes and Lessons Learned from COVID-19

Jason Hope – Director of International Health, Safety & Security
University of Kentucky
August 12, 2020
Landscape of Policy & Risk Analysis
January 2020

Undergraduate students may only engage in educational travel in countries or regions where the U.S. Department of State has issued a Level 3 (Reconsider Travel) Advisory or where the Centers for Disease Control & Prevention (CDC) have issued a Warning Level 3 after completion of a mandatory review process and with the approval of the Associate Provost for Internationalization in consultation with the college dean or designee. Undergraduate students may not engage in educational travel in countries or regions where the Department of State has issued a Level 4 (Do Not Travel) Advisory.

- University of Kentucky Administrative Regulation 4:9

Implications:
- Department of State and CDC advisories are the two formal guideposts that the University uses in making programmatic risk decisions
- The University is bound by these advisories in considering where to allow programming (consider senior administration’s perspective)
- If an advisory changed during a program, then what…?
The Old Way of Using Advisories

“Is it safe in …?”

Advisories and other risk analysis sources were traditionally used to understand if a place was safe for the purpose of building a future program there.

Though these decision points were subject to change, they were relatively stable.

Consider the timelines under which EA offices operate— we plan programs months in advance (at least!). Traditionally, advisories could help us understand long-standing risk issues in host countries, and if they did change, we could react on a case by case basis. They told us at a general level whether a country or region was “safe.”

*But COVID-19 upended that completely. Have you heard anyone talking about “COVID time?”*
What Does the Future Hold?

What is on the horizon for the coming winter and spring terms? How do we plan? Broaden our risk analysis horizons to include as many sources as possible

- OSAC Crime & Safety Reports
- OSAC listservs and the Academia Working Group – real time updates
- British, Australian, Canadian, etc. government resources
- Private sector organization resources – daily changes

What do we need to do to ensure we can cancel programs a month before they depart? A week before?

Fundamentally – what policy changes do we need to make to be able to make quicker and more agile decisions around programs? And how do we gain the trust of our administrations in being empowered to make those decisions (or at least have our recommendations accepted)?
Every major international crisis eventually reaches a tipping point where it moves from being something managed by the International Center to being managed by the central administration (e.g., student death, COVID-19). At UK, this tipping point was reached on March 12th - the day of the EU executive order.

- This is almost certainly an ‘institutional crisis’ at every university. Decision-making power may no longer lay with international offices.

- It is critical that International Center voices are at the table when this inflection point is reached. How can you ensure that you are at that table?

- Senior administrators may not understand the nuances of travel advisories, differences between Department of State and CDC Warnings, cultural nuances on-site, or program types.

- The easy answer for senior administrators is ‘no.’ But what does that mean for the future of international mobility? How can we influence the institutional conversation?
