

International Strategic Plans 2017

The following links are to examples of internationalization strategies from a variety of institutions. The documents were selected to represent a diversity of approaches and institution types. These institutions are intended as illustrative examples for senior international officers (SIOs) and internationalization leaders who are contemplating planning on their campus.

While many of the institutions represented in this list have been recognized for their internationalization efforts, their selection does not necessarily imply endorsement of policies, strategies, or best practices contained in the planning documents.

This is not a comprehensive list and any additions to the list and the sharing of strategic documents will only add to our understanding of Institutions' internationalization goals.
